

XiLOG4G XiLOGIOT

XiLog Connectivity

XiLog 4G & IOT loggers deliver data via 4G/NB-IoT/CATM1 using HTTPS to a secure API Decode Database. API integration allows data to be seamlessly integrated into Ovarro's Atrium platform and/or client SCADA or Third Party Platforms. Using an API provides an added level of data security (HTTPS) while providing the following key benefits:

FEATURES & BENEFITS AT A GLANCE:

Data Automation

- Automatic handoff of data eliminating any manual intervention saving time and reducing errors

Streamlined Visibility

- A streamlined approach allows tracking and monitoring of all data effectively by creating robust reports based on detailed and comprehensive datasets

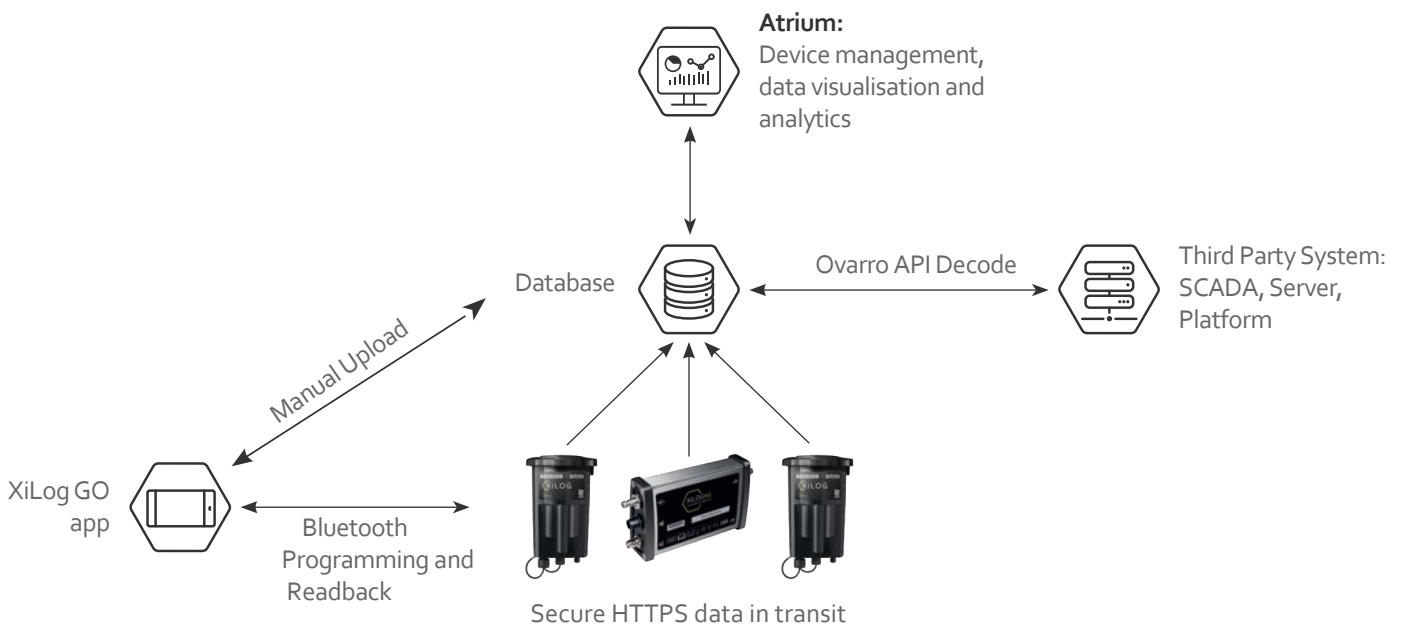

Scalable Deployment

- As logger asset fleets grow the API allows for continual connected systems and applications

Integral Security

- Embedded security with encrypted data in transit and while at rest
