

# Health and Safety Arrangements

GLO-POL-053

Health and safety is a responsibility we must all take ownership of.

David Frost, CEO

## Health and Safety Arrangements

To operationalise our health and safety policy, we have the following arrangements:

- **Risk Control Measures:** We implement engineering controls, administrative procedures, and personal protective equipment (PPE) to mitigate risks.
- **Incident Reporting and Investigation:** All incidents, near-misses, and hazards are reported promptly. Investigations lead to corrective actions.
- **Safety Committees:** We establish safety committees comprising representatives from various departments. They review safety performance and suggest improvements.
- **Training Programs:** Regular health and safety training cover topics such as fire safety, first aid, hazardous goods handling, and ergonomics.
- **Safety Inspections:** Scheduled inspections ensure compliance with safety protocols. Findings are addressed promptly
